

Special features of GVS high-security storage

GVS is the international abbreviation for Goldvorsorge.

Worldwide network

Your GVS storage location is part of an international network of GVS high-security storage facilities. There are numerous trading hubs for precious metals around the world. GVS trades at each of these locations and maintains specialized high-security vaults for storing your precious metals on site.

The great advantage of these trading hubs is that precious metals can be moved from one location to another in the shortest possible time. This gives every GVS customer "real security".

This is because if the situation in a country becomes unfavorable for precious metals, we will know about it in advance due to our extensive information network within the industry. We then contact our customers to find a more suitable GVS storage location. Within our network, transportation of your assets is possible at any time.

Buy & sell at any time

Storage and withdrawals are possible at any time, anywhere. With our GVS high-security storage system, you are not tied to any one location, as you enjoy worldwide flexibility.

GVS operates numerous branches as well as web stores in different countries, languages and currencies. We are happy to handle your storage transactions in person at any of our GVS branches. Or you can place buy and sell orders from the comfort of your own home by telephone, e-mail or via the national web store of your warehouse location in order to deposit precious metals directly in your storage or sell from it. Without any transportation costs or import fees.

All transactions can be processed via the most common payment methods and in any major currency.

You already own precious metals? Great, you can store them with us as well via personal drop-off or by parcel service. After a routine authenticity check, your precious metals will be recorded in detail in the storage contract, guaranteeing full insurance coverage.

Examples of the flexible use of our high-security storage system:

- You are on a business trip in Asia and would like to take advantage of an unexpected investment opportunity. We transfer the amount to your account.
- You are on safari in Africa and your cash goes missing. Within a few hours you have enough money available again via Western Union.
- Your partner has planned an extensive shopping trip. We transfer the money to your credit card account to increase the shopping limit.

Tax-free purchase and tax-free profits

Many commodities are subject to sales tax on physical purchases. At most GVS storage locations, however, it is possible to buy silver, platinum and palladium tax-free when stored in a bonded warehouse.

Combine this option with another great advantage of this asset class: after a holding period of one year and one day, the profits from your precious metals sales are completely tax-free in many countries.

Confidentiality, no registries

You remain the owner of the stored precious metals at all times - GVS merely holds them in your name. Your data will be treated with absolute confidentiality and will not be passed on to anyone. We are 100% independent of banks and do not report to the safe deposit box registry or any other asset registry or authorities.

In addition, information on your stored precious metals is never stored online and cannot be accessed there. This means that you are always protected from hackers, unsafe servers or attacks on your data. Your precious metals are always listed in detail on the storage contract. You can request this overview at any time for free and it can only be viewed by you.

For further security, you can use a personal customer account in our web stores to send 256-bit encrypted messages, such as inquiries about your assets or changes to your GVS storage contract.

Flexible powers of attorney

You can issue powers of attorney at any time so only those persons you authorize can access your stored precious metals. If you wish to make a change, simply send us a message and the power of attorney will be amended or canceled. Life circumstances often change, so GVS offers you full flexibility and therefore security in every situation.

Furthermore, individual agreements can be set up with the authorized representatives, for example:

- Two or more persons can only access your assets jointly.
- Sales/wire transfers are only possible up to a certain amount.
- Access only permitted in the event of death.

Independent warehouse audits

While industry regulations require annual warehouse audits, GVS high-security storage overfulfills these requirements by subjecting its storage facilities to a comprehensive inventory audit twice a year. This ensures that all stored precious metals are always physically present and also not pledged as collateral elsewhere. You can find the corresponding audit reports in our webshops at the respective storage location page. The auditor will also issue an individual report for your personal storage upon request.

Many years of experience

GVS has been active in the precious metals business for over 20 years and is one of the largest precious metals dealers in Europe. All GVS subsidiaries are 100% debt-free and therefore outside the banking system. In addition, high-security storage is carried out by an independent company within this group of companies, therefore eliminating all trading risk. This unique setup guarantees all customers "real security".

Whether by e-mail, telephone or during a visit to one of our branches, our team of experts will be at your service to take your request and offer personal consultation.

GVS is the official distributor of the world's leading mints. A detailed list can be found in the webshop under references. GVS does not trade for the sake of accumulating currency, but instead invests exclusively in precious metals. All fiat currency is immediately converted back into gold and silver. Just like every GVS storage customer, we value precious metals above all else. "Real security" always has priority.

Market updates, newsletter & videos by GVS Chief Economist Thomas Bachheimer

GVS Chief Economist Thomas Bachheimer runs one of the largest German-language information platform for free speech and easy access to information, all free of charge - www.bachheimer.com
